Tree gifts that grow over time

 90 trees gifted

Want to give a gift that grows over time? Consider a physical tree that can be planted anywhere as a daily reminder of a growing, long-term collaboration. The shoots are protected by a gift box with a planting manual and a personalized message. You can gift Evergreen oak, English oak, European beech or Sugi.

Agroforestry in Madagascar, to be planted in 2026

 1177 trees planted

In the course of 2026, these agroforestry trees will be planted in Akamasoa or Tamatave. Once the planting has taken place, this section will be updated with the correct geolocation. The trees introduced in this project are selected to generate benefits for the soil, biodiversity, and the local economy: - The chosen species act as natural soil conservation agents, helping prevent erosion and improving soil structure. - They support local biodiversity by offering habitat for wildlife and contributing to ecological balance. - Many of the planted species have commercial value, creating new economic opportunities for farmers and surrounding communities. This project combines cash crops, forest species, and fruit trees. The selection of tree species is guided by two key criteria: 1) Regional environment: Each intervention zone has its own characteristics. We choose species that can thrive in the local soil and climate while contributing to the restoration of the forest landscape. 2) Farmer needs: We work closely with partner farmers to identify species that support income-generating activities through the sale of their products.
