Supports

199

trees planted

153.09

tonnes of CO₂
absorbed during lifetime

At Landa Languages, growth is at the heart of everything we do. Together with Go Forest, we plant trees to support the reforestation project in Madagascar. Just as we help our students grow in confidence and language skills for real-life and professional communication, these trees help strengthen the green lung of our planet. Thanks to our learners and partners, forests are growing alongside language proficiency, creating a positive impact that reaches far beyond our training sessions. - *Sofie Martens, Landa Languages*

Projects we support

Farms planted in January 2024 - Akamasoa agroforestry project, Madagascar

 60 trees planted

On these farms, multiple small agroforestry plantations were executed in collaboration with the local farmers and as part of the large Akamasoa agroforestry project. During January-March 2024, 7 farms were planted with 4596 trees, including: - 25% cash crops, such as Pink Berries and Ravintsara - 72% forest trees, such as Acacia, Jacaranda, and Eucalyptus - 3% fruit trees, such as Rotra

Farms planted in March 2025 - Akamasoa agroforestry project, Madagascar

 60 trees planted

On these farms, multiple small agroforestry plantations were executed in collaboration with the local farmers and as part of the large Akamasoa agroforestry project. During March 2025, 6809 trees were planted, including: - 25% cash crops, such as Pink Berries and Ravintsara - 72% forest trees, such as Acacia, Jacaranda, and Eucalyptus - 3% fruit trees, such as Rotra

Farms planted in December 2023 - Akamasoa agroforestry project, Madagascar

 14 trees planted

On these farms, multiple small agroforestry plantations were executed in collaboration with the local farmers and as part of the large Akamasoa agroforestry project. During December 2023, 24 farms were planted with 3944 trees, including: - 25% cash crops, such as Pink Berries and Ravintsara - 72% forest trees, such as Acacia, Jacaranda, and Eucalyptus - 3% fruit trees, such as Rotra

Mangrove plantation in Majunga, March 2026

 65 trees planted

In the Bombetoka Bay located in the North-West of Madagascar, more specifically in the village of Nosy Kabija (Belobaka municipality, Boeny), we've planted new mangrove trees on two sites (0.29 ha & 0.45 ha) to restore the mangrove forest. In March 2026, 5055 mangrove trees of two species were planted here: Ceriops tagal and Rhizophora mucronata. The overall objective is to restore degraded lands and promote better management of the mangrove ecosystem to improve the living conditions of the local communities. Moreover, the mangroves provide spawning grounds for shrimps, crabs, and fish, which helps to boost the economy of the community.
