Seagrass transplantation area, May - July 2024

 26 1/5 square meters of seagrass planted

In 2024, between May and July (the planting season), and with the help of over 40 volunteers, we harvested, processed, and replanted over 8,000 seagrass plants - rhizomes - in Loch Craignish over an area measuring approximately 485 square meters of seabed. We focused on a single area, Dun Mhuilig Bay, adjacent to an existing seagrass meadow, where the seabed has positive oxygen levels. The seagrass was planted in bundles, each covering 1 square meter of seabed. The most southern polygon was transplanted from 6 to 11 May, 2024. The first and second polygon above were transplanted from 4 to 8 June, 2024, and from 21 to 25 June, 2024. The most northern polygon was transplanted from 16 to 19 July, 2024.
