Yntro is een Belgische projectontwikkelaar gevestigd in Sint-Denijs-Westrem. Yntro ontwikkelt vastgoedprojecten in diverse categorieën waaronder hotelvastgoed, vakantieverblijven, tweede verblijven en bouwgronden aan de Belgische kust. Yntro begeleidt kopers op een persoonlijke en transparante manier doorheen hun vastgoedinvestering. Eerlijkheid, transparantie en betrouwbaarheid vormen de kern van hun aanpak. Zo bouwt Yntro stap voor stap aan een community van tevreden klanten.

Projects we support

Amblève project, Belgium 2026-2027

 33 trees planted

Thousands of hectares of forests are threatened by climate change, pests, and diseases in Belgium. That is why we, together with Sylva Nova, decided to give the forest ecosystem in Belgium a hand as well. We have two project types: 1) Additional forest: We are planting new forests on neglected land or agricultural land. 2) Non-additional forest: We restore existing forests and make them more resilient. In Belgium and Europe in general, we do not always have new land available for forests. This is caused by the fragmentation of ownership and because of the competition for land. Important to notice is that we never plant after voluntary harvesting (clear-cutting). There is only restoration after a storm, pests, diseases, forest fires, ... Our projects in Belgium always provide added value to the forest in terms of the environment but also help the other functions of the forests, such as the social functions, the CO₂-sequestration, and the landscape. The tree species that we plant in Belgium are diversified tree species that are adapted to the local conditions. We select the species based on the soil, climate conditions, global warming, etc. This ensures that we make a maximum impact. Additionally, the projects exist out of planting the trees but also include monitoring visits to ensure that the plants are recovering well. With the help of a "management plan", there is more involvement by the forester. We are, therefore, sure that they are participating in a serious project that is treated in a sustainable and respectful way.
